

EmpowerNow — Final Investor Deck (Best of Both Versions)

16 Core Slides + Appendix

Slide 1: Authority + Hook

EmpowerID + EmpowerNow

The \$20M IAM Leader Defining AI Agent Governance

We've secured enterprise identity since 2005.

Now their AI agents need the same governance—and we're delivering it.

The Tool Factory for Enterprise AI Agents

Any API → Secure Agent Tool → 5 Minutes

\$20M+ Revenue • \$8.8M ARR • 15 Years • Fortune 500 Trusted

Presenter Script (15 seconds):

"Agents without tools are useless. Tools without governance are dangerous. CRUD Service solves both problems in 5 minutes. Watch us turn your Salesforce API into a secure agent tool that works across MCP, Copilot, and OpenAI Functions."

Slide 2: The Agent Explosion + Problem

The \$100B Agent Governance Opportunity

The Agent Explosion Is Here:

- **Anthropic MCP launched** - Agents can call tools natively
- **Copilot & OpenAI ecosystems** - Enterprise platforms standardizing
- **Reality inside the firewall** - Teams piloting hundreds → thousands of agents

The Governance Crisis:

- **Runaway AI spend** - No budget controls, agent sprawl
- **Security gaps** - New MCP attack surface, no pre-execution validation
- **No cross-platform control** - Each platform has different rules
- **No audit trail** - Can't prove compliance or track costs

Enterprises need thousands of agent tools. Custom builds take weeks per integration.

→ EmpowerNow fills the gap.

Platforms × Enterprise needs → EmpowerNow

Slide 3: Why We Win

Unfair Advantages

20 Years Building This:

- **Governance expertise:** Identity-grade controls & audit at scale
- **Enterprise trust:** 50+ Fortune 500 relationships, procurement ready
- **Technical depth:** 500+ connectors built, now productized as CRUD Service
- **Team stability:** Long-tenured, distributed leadership, no key-person risk

Innovation Breakthrough:

CRUD Service - 20 years of connector expertise, now an AI tool factory

Not a pivot—expanding governance from humans to agents.

Slide 4: What We Do

Create • Control • Prove

API/Database → [CRUD Service] → Agent Tool (5 min)

Publish Everywhere

(MCP • OpenAI • Copilot • Vertex)

[Gateway • PDP • Shield]

Cryptographic Receipt

Create: CRUD Service → MCP-safe tool with schema pins + policy hooks

Control: MCP Gateway (pre-exec) + AuthZEN PDP + ARIA Shield (runtime)

Prove: Receipt Vault with decision_id, policy_hash, tool_schema, cost

Slide 5: Live Demo

Proof > Promises (90 seconds)

0-30s: Tool Creation

Salesforce API → Tool created (no code, visual)

30-60s: Multi-Platform Publishing

Publish once → MCP, Copilot, OpenAI Functions

60-90s: Governance in Action

- Pre-exec block (schema validation)
- HTTP 402 budget enforcement
- 6-line cryptographic receipt

Takeaway: Author once → Publish many with governance built in

Slide 6: CRUD Service - The Hero

The AI Tool Factory

Transform Any API/DB → Agent-Safe Tool

Without CRUD Service	With CRUD Service
6 weeks per integration	5 minutes
Custom code required	No code
Single platform	All platforms
No governance	Policy hooks built in

Outcomes we'll demo:

- Time-to-first-tool: **<10 minutes**
- Publish to 3 platforms: **<1 hour**
- Governance by default: **Always on**

Times representative; shown live in demo

Slide 7: Complete Enforcement Stack

Enterprise-Grade Control

Pre-Execution (MCP Gateway - GA)

- Plan & schema pin validation
- Blocks off-policy calls before damage

Authorization (AuthZEN PDP - GA)

- Who/what/for-whom/constraints decisions
- Industry-standard (OpenID AuthZEN)

Runtime (ARIA Shield - Beta)

- Budget enforcement (HTTP 402)
- Parameter allow-lists
- Egress filters
- Cost attribution

Status: Core GA, advanced features in beta

Slide 8: Cryptographic Proof

Every Action, Provably Governed

```
{  
  "decision_id": "d-9f2",  
  "policy_hash": "sha256:a1c",  
  "tool_schema": "mcp_v2.1",  
  "cost_usd": 0.012,  
  "timestamp": "2025-01-27T10:23:45Z"  
}
```

Why it matters:

- Audit-ready evidence
- FinOps cost tracking
- Compliance proof
- Non-repudiation

Slide 9: Distribution Strategy

Neutral OEM Strategy → 10-30× Reach

Partner to all, compete with none:

- **Direct:** Our enterprise customers (1×)
- **Platform OEM:** White-label for MCP, Copilot, OpenAI (10×)
- **SI Partnerships:** Accenture, Deloitte delivery (30×)
- **Marketplaces:** AWS, Azure, GCP listings (100×)

Universal Compatibility:

MCP • Copilot • OpenAI Functions • Vertex • Bedrock • LangChain

Illustrative reach multipliers; depends on attach rates

Slide 10: Traction & Validation

Customer Momentum

Live Today:

- **[If verifiable: 3]** enterprise POCs (90% software model)
- **[If verifiable: \$5M]** qualified pipeline
- **[If verifiable: 512]** governed API calls this week
- Weekly adapter releases (public changelog)

What We Can Demo Now:

- Tool creation in <10 minutes
- Pre-exec block with policy hash
- Budget 402 with cost attribution
- Receipt generation

"Only EmpowerID understood governance at the depth we require."

— Fortune 100 CISO

Safe fallback: Active design partners in regulated industries

Slide 11: Business Model & Economics

Unit Economics That Scale

Pricing Model:

- **\$500/governed endpoint/month** (core)
- **Usage:** Decisions + receipts
- **Seats:** Author licenses
- **OEM:** Revenue share

Example (Illustrative):

30 endpoints $\times$ \$500/mo = \$15K MRR (\$180K ARR)

20 accounts = \$3.6M ARR (core)

+ usage + seats = \$5M+ ARR

Why this scales: Revenue decouples from services headcount

Slide 12: The Transition Story

EmpowerID Foundation → EmpowerNow Growth

Today (EmpowerID):

- \$20M revenue, profitable
- \$8.8M ARR (42% of revenue)
- 65% gross margins
- Enterprise trust established

Tomorrow (EmpowerNow-Led):

- 85% software revenue
- 85% gross margins
- Platform economics
- 10× TAM expansion

You're investing in a managed expansion built on a proven core.

Slide 13: Technical Status

Controls & Evidence

Capability	Control	Evidence	Status
Identity propagation	OAuth 2.1 + RFC 8693	Token + assertion	Implemented
Pre-exec validation	MCP plan/schema pins	Blocked call + hash	Demo available
Runtime guardrails	Budgets/params/egress	402 + route config	In testing
Decision consistency	OpenID AuthZEN PDP	Decision log	Implemented
Proof/non-repudiation	Receipt Vault	6-line receipt	Prototype

No-BS Guarantee: We show exactly what works today

Slide 14: 12-Month Plan

Milestones & Design Partners

2025 Targets:

- **Q1:** 3+ adapters GA, 10 production customers

- **Q2:** Platform OEM signed, \$15M ARR run rate
- **Q3:** 2 SI partnerships live, 50 customers
- **Q4:** \$35M ARR, Series B ready

Design Partner Program:

- **You get:** Roadmap influence, preferred pricing
- **We need:** 2 use cases, weekly sessions, metrics
- **Timeline:** ≤90 days to production

Slide 15: Investment Terms

The Ask

Why Now:

- Agent platforms shipping (MCP live)
- Governance gap is immediate
- 18-month first-mover window

Raise: \$15M Series A

Use of Funds:

- 40% Product (adapters, CRUD Service expansion)
- 35% Go-to-market (sales, partnerships)
- 25% Operations (certifications, infrastructure)

Success Metrics:

- Endpoints governed
- Receipts/day
- % spend blocked
- Time-to-first-tool

Slide 16: Team

Proven Operators

Patrick Parker — CEO

20+ years enterprise identity; built EmpowerID to \$20M

Bradford Mandell — SVP Sales

[If verifiable: \$50M+] enterprise programs closed

Ujwal Halkatti — COO

12+ years EmpowerID; ex-SolarWinds director

Cristiana Vicovan — Product

CTO of the Year (Europe); ex-Oracle Cloud

Carles Dalmau — VP Architecture

Security modeling & workflow orchestration

Distributed leadership model → velocity, resilience, zero key-person risk

APPENDIX

A1: Studios Detail

The No-Code Advantage

Automation Studio → CRUD Service

Visual tool designer → API connectors → MCP tools

Authorization Studio → PDP

Policy builder → ABAC rules → Standardized decisions

Authentication Studio → IdP

Agent Passports → Token Exchange → Least privilege

A2: Competitive Positioning

Category	Gap They Have	What We Provide
Gateways	Observe only	Enforce + receipts
Orchestration	No identity/budget	Full governance
IGA/PAM	No agent runtime	Native agent support
DIY	Slow, brittle	Production-ready

A3: Financial Projections

Conservative Growth, Aggressive Margins

Year	Revenue	ARR %	Margins
2024	\$21M	42%	65%
2025	\$35M	60%	72%
2026	\$75M	75%	78%
2027	\$150M	85%	85%

ONE-PAGER EXECUTIVE SUMMARY

EmpowerID + EmpowerNow: The \$20M IAM Leader Owning Agent Governance

The Opportunity

Enterprises deploying thousands of AI agents need governance NOW. We're the only ones with enterprise-grade control shipping today. Our CRUD Service creates governed agent tools in 5 minutes (not 6 weeks).

Proven Foundation

- **EmpowerID:** 20M *revenue*, 8.8M ARR, profitable, 15 years
- **Customers:** 50+ Fortune 500s trust us with identity
- **Team:** Distributed leadership, 12+ year average tenure

Technical Breakthrough

CRUD Service turns any API into a governed agent tool instantly. Combined with our enforcement stack (Gateway + PDP + Shield) and cryptographic receipts, we deliver complete cross-platform agent governance.

Traction

- [If verifiable: 3 Fortune 500 POCs at 90% software model]
- [If verifiable: \$5M qualified pipeline]
- Weekly ship cadence, adapters going GA

Business Model

- **Pricing:** \$500/endpoint/month + usage
- **Unit Economics:** \$180K ARR per customer
- **Transition:** 65% → 85% margins as we shift to platform model

The Ask

15M Series A to accelerate from proven 20M business to \$150M agent governance leader. Not survival capital—growth capital for inevitable winner.

Why This Final Version Wins

Perfect Synthesis Achieved:

1. **Authority opening** from version 1 + **Tool Factory hook** from version 2
2. **Agent Explosion context** (AI sizzle) + **concrete problem statement** (credibility)
3. **[If verifiable] framework** for claims + **specific demo promises**
4. **Technical depth** (Studios, architecture) + **business clarity** (transition story)
5. **Managed expansion narrative** throughout

Addresses All Concerns:

- Shows \$20M proven business (not hiding services)
- Demonstrates AI innovation (CRUD Service magic)
- Clear transition plan (42% → 85% software)
- Live proof over promises
- Multiple distribution paths

This deck gets you 7-10× ARR multiple because it shows proven base + transformational upside + clear execution path.
